

## **Village Hall Report**

As everyone is aware the last few years have been very challenging but for the Village Hall have also been very productive. The Village Hall has undergone many changes over the last few years thanks to the restrictions of Covid and a number of grants due to those restrictions. We have been able to redecorate throughout, have a new kitchen fitted including new flooring, a new oven and refrigerator, a fire door between the hall and the kitchen and new flooring in the lobby. We have also been able to redesign the garden behind the hall and the work on that is almost completed thanks to the hard work of Mick and Linda.

This year, thankfully, it was back to business as usual and bookings have been steady. A new monthly Men's night was introduced and swiftly followed by a Ladies' night both of which have proved very popular. The Craft club was suspended during the winter but is restarting on 15<sup>th</sup> March. The Christmas period was very busy and coffee mornings are again proving very popular. A new outside light focused on the car park and fitted with a time switch will make the hall much safer for those leaving after dark.

We are looking ahead to the coming year when we will be celebrating the Coronation of King Charles the third as well as providing a number of entertainments and events for the benefit of the Village and its Hall.
